A very early morning departure leads us to Planet Baobab near Gweta, from where we embark on an expedition to Ntvetwe Pan to encounter some of Botswana's distinctive landscapes and extraordinary creatures.

NTWETWE PAN EXCURSION:

The Ntvetwe Pan is one of the two major pans that make up the Makgadikgadi Pans, and is amongst the largest salt pans in the world. The pan was fed by the Boteti River until it was left permanently dry following the construction of the Mopipi Dam, which provides water for the diamond mines in Orapa. The waters may have returned to the river but Ntvetwe is now famous for its extraordinary lunar landscape, particularly the rocky outcrops, dunes, islets, and channels found along the western shore. We explore the area, in search of uniquely adapted desert species such as bat eared foxes, springbuck, kori bustards, and some of the Kalahari's most fascinating inhabitants, the meerkats. By spending quality time with these incredibly social, superbly adapted animals, you will be able to see how they interact with each other and their environment. Due to an ongoing habituation programme it's possible to get up-close and personal with these captivating creatures.

After lunch we have the opportunity to explore a nearby village to experience modern African village culture. Learn about the history and traditions of the Batswana people from a local guide whose knowledge has been inherited from their forefathers. Visit the local primary school, 'Sekolo' with its outdoor classes and meet the children, visit the Kgotla – a traditional court that governs the village and get a glimpse of rural Botswana life.

In the late afternoon we take a stroll with our guide through an impressive baobab grove, as he explains the local ecology, geology and the unique biology of the baobabs, which are in fact not trees but the largest succulents in the world.
